With EvaExpress, taking orders has never been simpler. Designed specifically for waiters, this app ensures smooth and error-free communication between the kitchen and the front of house.

Say goodbye to handwritten notes and hello to faster service, happier customers, and increased efficiency.

Available for both Android and iOS

Eva Express is a mobile order device designed for waiters. Fully integrated with Oracle Simphony POS through Transaction Services Gen 2.

With EvaExpress, waiters can focus more on delivering excellent customer service rather than worrying about the technicalities. The app's intuitive interface ensures that anyone can pick it up and start using it instantly.

Seamless Integration

Real-Time Order Tracking

Our real-time tracking feature ensures that every order is closely monitored from placement to fulfillment. This reduces wait times and enhances communication between the floor and the kitchen, ultimately improving guest satisfaction.
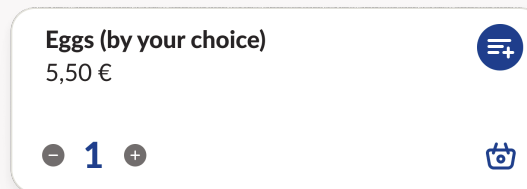

Mobile Ordering Platform

Eva Express works seamlessly on both iOS and Android devices, providing an intuitive and user-friendly interface for waitstaff. With this tool, orders are processed quickly, reducing errors and improving overall restaurant service.

Mobile Order

With Eva Express, streamline order management for staff, enabling them to place orders directly from mobile devices to the kitchen or bar. This mobile solution is integrated with Oracle Simphony, ensuring real-time updates and enhanced efficiency.

Point of Sale (POS) Integration

Our app is fully integrated with Oracle Simphony POS, ordering a comprehensive solution for restaurant management. Orders placed on EvaExpress are synced instantly with POS system, ensuring accuracy and speed at all times.

Customizable Menu

With Eva Express, restaurants can easily customize their menus to reflect daily specials, promotions, or seasonal items. The interface allows dynamic updates, ensuring that waitstaff always have the latest menu options at their fingertips.

Oracle Simphony Transaction Services Gen 2 Integration

Eva Express utilizes Oracle Simphony Transaction Services Gen 2 for seamless and secure order processing. This ensures real-time data synchronization and reliable transactions between the app and the POS system.
