

Zoe Zoom isn't just another booking engine; it's a seamless extension of your Oracle Hospitality OPERA Cloud PMS.

Enhance your hotel's **direct booking** capabilities with Zoe Zoom, an advanced booking engine designed for seamless compatibility with Oracle Hospitality OPERA Cloud PMS. Our platform provides accurate, real-time room availability and rates, paving the way for a new era of **efficient** hotel operations.

Customer loyalty is directly tied to your main hotel domain. Create a seamless and engaging guest experience across all digital touchpoints, designed to optimize conversion rates. Increase your direct bookings and turn travelers into guests right from your website. **Simplify** your hotel loyalty management and diversify dynamic pricing with Google experiences.

UpSell/CrossSell, dynamic prices

With UpSell functionalities, you can increase the average length of stay (ALOS), and enhance the total revenue (TRevPar).

Innovative Loyalty System

Guests receive information about their loyalty discount as soon as they enter their email address in the second step of the reservation process. Payments are sent directly to OPERA Cloud PMS. All transactions through your payment gateway are automatically **integrated** into OPERA Cloud PMS, where invoices are generated, reducing your manual workload.

Google Hotel Ads

The image displays a hotel booking interface on both desktop and mobile. The desktop view shows a room selection page for 'SPA PREMIUM ROOM' with a price of 427.40 € and 345.71 € including taxes. The mobile view shows the same page on a smartphone screen.

Effortless Integration, Real-Time Results

Eliminate discrepancies and delays - our integration ensures precise accuracy in room availability and pricing, providing a seamless, real-time **experience** for both guests and hoteliers.

Integration with your existing hotel website under your main domain takes just one minute.

Developed using the latest technologies, our booking engine fully integrates into your website, ensuring the header, menu, and footer are consistent with the rest of your pages. This integration does not use an IFRAME.

Analyze behaviour of your direct bookings - TTA and achieved prices for days/weeks/months over year
